

Northwind Retail Resource Ownership and Tagging Register

Synthetic training document | Source: CMDB reconciliation on September 1, 2026

Tagging quality summary

Required tags are owner, costCenter, environment, application, and dataClassification. Eight of ten reviewed resources have an owner and environment; four are missing a costCenter; the unattached disk has no retentionUntil value. Missing metadata blocks automatic deletion and obscures chargeback.

Resource	Owner	Cost center	Environment	Application	Data classification	Exception
analytics-vm-01	data-platform@northwind.example	CC-241	Development	sales-forecasting	Internal	Schedule tag set to business-hours.
analytics-vm-01-data	data-platform@northwind.example	Missing	Development	sales-forecasting	Internal	Missing retentionUntil and recovery ticket.
web-prod-01	web-team@northwind.example	CC-118	Production	customer-portal	Confidential	None.
democost-app-plan	web-team@northwind.example	CC-118	Production	customer-portal	Confidential	Capacity review owner assigned.
democost-sql	finance-app@northwind.example	CC-310	Production	finance-ledger	Restricted	Production tier changes need DBA approval.
democostarchive	records@northwind.example	CC-402	Production	records-retention	Internal	Lifecycle policy pending legal review.
democostregistry	platform@northwind.example	Missing	Production	shared-platform	Internal	Premium feature-use assessment pending.
democost-unused-ip	cloud-ops@northwind.example	Missing	Development	network-shared	Internal	Change record required before deletion.

Policy rules used by this dataset

Development resources with a business-hours schedule tag should be reviewed when uptime exceeds 95% in a calendar month. Production resources must not be automatically deleted or downsized. Unattached disks require an owner confirmation and a documented retention date. Any public IP removal requires a dependency check and approved change record.
