

Northwind Retail Cost Optimization Decision Log

Synthetic training document | Decisions approved through September 3, 2026

Decision register

ID	Resource / scope	Decision	Status	Rationale and guardrail
FINOPS-104	analytics-vm-01	Pilot business-hours shutdown; evaluate D4s_v5 in dev	Approved	Low p95 CPU and development classification. Maintain weekday 07:00-20:00 schedule during forecast runs.
FINOPS-105	analytics-vm-01-data disk	Hold deletion pending owner confirmation	Pending	Unattached 43 days, but finance forecast rollback window closes Sep 10. Retain snapshots until approval.
FINOPS-106	democost-app-plan	Do not downsize this month	Deferred	Holiday campaign load test is scheduled Sep 18. Reassess after traffic peak.
FINOPS-107	democost-sql / finance-prod-db	Evaluate 1-year reservation; no tier downgrade	Approved	p95 DTU reaches 76%; current capacity protects month-end processing.
FINOPS-108	democost-unused-ip	Remove after dependency scan	Approved	No association found; Cloud Ops owns change window.
FINOPS-109	democostregistry	Retain Premium SKU until feature assessment	Pending	Need to confirm private endpoint and geo-replication requirements.
FINOPS-110	democostarchive	Implement scoped lifecycle policy	Approved	Legal approved Archive after 365 days only for invoices/ prefix; other data remains Hot.

How to interpret recommendations

This log deliberately includes approved, deferred, and pending actions. A cost assistant should distinguish an observed opportunity from an authorized change. For example, it may identify the unattached disk as a review candidate, but must not assert that it has been deleted or that its savings are guaranteed.
