

Northwind Retail Cost Anomaly and Exception Report

Synthetic training document | Alert review for August 2026 | Prepared for FinOps triage

Detected anomalies

Alert	Observed change	Root-cause assessment	Resolution state
ANOM-221: Managed disk spend	+\$364 month over month	New 1 TB Premium_LRS disk remained unattached after cancelled analytics migration; snapshots retained.	Open - owner response due Sep 10.
ANOM-222: App Service spend	+\$1,165 month over month	Worker count increased from 2 to 3 before marketing test; low utilization after test ended.	Deferred - retain capacity until Sep 18 load test.
ANOM-223: Container Registry spend	+\$262 month over month	Premium registry image accumulation and replication storage; no retention policy.	Open - platform assessment in progress.
ANOM-224: Untagged spend	\$1,184 unallocated	Missing costCenter on shared services and a disk artifact.	Open - tagging backlog.

Known exceptions

Resource	Exception	Expires	Required follow-up
democost-app-plan	PremiumV3 x3 retained for holiday load testing.	Sep 30, 2026	Review worker count after campaign and record performance result.
democost-sql	Current tier retained for month-end batch and p95 DTU 76%.	Oct 15, 2026	Price reservation; do not downgrade based on average DTU.
democostarchive	Hot tier retained for legal discovery on claims/ prefix.	Nov 1, 2026	Apply lifecycle only to approved invoices/ prefix.
analytics-vm-01-data	Disk retained pending rollback window.	Sep 10, 2026	Owner must set retentionUntil or approve deletion.

Evaluation signal

This document is intended to test negative constraints. A faithful answer must not recommend immediate deletion of excepted resources or claim that production capacity can safely be reduced without the documented follow-up conditions.
